Whispers from The Brighter World

Friday, August 12, 2016 – 10:00 a.m.

The 'beyond', this unknown, remains a mystery to human beings; it cannot be otherwise in the present era. Times are changing very slowly and are putting in place what will be tomorrow. Such is the evolutionary cycle of this planet. However, little by little, a completely different world is being built, one where evolution and all that lives here below will follow a pace that is both slower and more active. Everything has its raison d'être. Ancient civilisations have left foundations capable of helping present-day humanity, and this will happen again. Nothing, since the dawn of time, has existed in vain; each stone of this edifice is there for a purpose and determines the outcome of this programme. It is wise to make the most of the present moment and of what life offers each one. Choices are sometimes necessary, and it is not always easy to make them, but destiny is there, governing the life of each individual, no matter what he or she may envisage. The divine thread is to be followed, in a state of surrender and faith in this power that directs us.

Blessings to all.
