Saturday, July 15, 2000 - 10:00 a.m.

Don't be anxious about the future of our relationship. You will not be asked anything you cannot do. We don't drain you of energy as this doctor has said; it is rather the opposite. Do not let yourself be dragged into other contacts to please your circle; save yourself to only focus on ours. Your health problems are not easy to manage; this confinement does not facilitate an improvement of your state. We give you what is needed to facilitate these exchanges, which result in these written messages. This role should make you happy, it is not ordinary; not many humans have this real faculty. Rejoice for being this luminous point, which enables us to express ourselves and thus give to people open-minded enough to understand, the evidence of another existence beyond this Earthly life. Our worlds are very close to each other; vibration-wise, they are adjacent, but you do not perceive it. We do not leave you as you tend to believe, and we guide you, as much as possible."
