Whispers from The Brighter World

Sunday, October 2, 2016 – 10:00 a.m.

All these beautiful testimonies coming towards you show you once more the importance of these messages and their impact on our abhyasis. The messages are necessary on this initiatory journey aiming at a higher state of consciousness: they foster each person's progression, a decisive and overall advancement across this entire 'Sahaj Marg' Mission. We are happy about it, and we expect more still. Vibratory changes will take place in the future, following unprecedented upheavals that will bring about a different mindset, much more sensitive to the realities of life related to human evolution. In the future, centuries of stagnation will be left behind, justifying this extraordinary work we propose in the service of divine expectations on this critical aspect. May all our brothers and sisters envision the best and contribute in their own manner to this ascent, planned under our very special blessings.
