Whispers from The Brighter World

Wednesday, November 16, 2016 – 10:00 a.m.

Everything in its own time; important changes will occur in this world, we keep repeating it, and preparing minds is necessary. Here, we are moving in this direction. Our abhyasi brothers and sisters must get used to this idea and, above all, they should progress in order to better deal with what tomorrow's world will be – a world in which an unprecedented open mindedness will occur.

We are preparing it in our own way. Our dearest Kamlesh is doing his part in the register which is incumbent upon him; he will know how to handle events – there will lie the challenge. Everything will be done at the right times. Evolution is necessary; from its beginning, the world has constantly changed according to the needs of the moment. Spirituality will unfold more and more and will become necessary for human beings, disturbed by substantial vibratory changes.

A different life will prevail; it will not be to everyone's taste, but the evolution of humanity goes through cycles that it cannot escape. In the future, Sahaj Marg will surely become an important refuge.

Today's abhyasi is a forerunner, an 'envoy' in a way, destined to contribute to the growth of this spiritual path that will leave a significant mark here below. Human evolution proceeds very slowly, at its own pace; thus is accomplished the higher will. We conform to this, and the Sahaj Marg path is a beautiful example. The future will give it tremendous importance.

Very special blessings to all.

Babuji
