Whispers from The Brighter World

Friday, November 25, 2016 – 10:00 a.m.

Life is a whole, the very essence of which escapes human knowledge. It cannot be truly grasped in its reality, that time has not yet come. Many steps remain to be taken before that can happen. This world advances step by step, according to the needs of the moment; only an unprecedented spiritual advance could change the face of things. Nothing can be forced, in this domain, the divine laws cannot be circumvented. We revert to the same topics – how could we do otherwise. The normal cycle of life must be respected so that true values are established here below, in every respect.

This does not seem possible at present, but a time will come when everything will be different.

At our level, Sahaj Marg contributes to the spiritual elevation of many human beings. They are our brothers and sisters, and this is not mere happenstance. All have been prepared for a long time, to follow a path that was wanted by the higher powers.

Human evolution proceeds first and foremost by this spiritual aspect that is essential to the progress of humanity. This is not new, but times are changing, and such an approach is necessary more than ever. Only spirituality will change the world, it has been said, and we confirm it here very clearly. Very special blessings to all.
