Whispers from The Brighter World

Friday, December 23, 2016 – 10:30 a.m.

The messages that are being taken down elsewhere are not in accordance with our wishes. Human imagination has always resulted in such things; we repeat, for our dear son Kamlesh, these writings are and will remain unique. Human beings have always acted in this way; similar occurrences – spurious Bibles, Korans, writings coming from Great Masters of the past, have been falsely replicated, which is deplorable. Alas, this is how it is.

Our messages will not be spared either; the present already shows this.

The quantity of these writings is singular; we wish them a 'long life' and a very satisfactory impact on hearts calling for the Divine. May the best come about, under our ceaseless blessings.

So it is.

Babuji
