Mahasamadhi of Babuji

(In meditation, I express all my love to Babuji, in a pictorial way. He comes and tells me:)

I heard you, my daughter, you will always be able to soften me; write! Yes, I am here, my child, your beautiful declarations touch me. I believe I already told you everything about your health problems. Remain confident and surrendered. Your heart is in a state of serenity and beautiful light, which is not the case for many beings who are physically very fit. You are well placed to know that patience is a great strength. No matter the human judgements about you, the misunderstandings about your difficulties, we do know; that is what matters. I will come back for my birthday. You will both have my attention and my blessings. Meditate more and better.
