Whispers from The Brighter World

Thursday, May 6, 1999 – 10:00 a.m.

As we have already mentioned, it is unfortunate that even preceptors could spread such nonsense.

Never mind, let us turn the page. That has not prevented the work from being done, it is huge.

You all have no yardstick, or the means of evaluating this extraordinary result. That is not important. It is enough for you to believe in us and to advance without losing the enthusiasm which drives you in such circumstances.

Do not forget that you are the soldiers of faith. You are taking part in the great upheaval that is coming. You may not witness its effects on Earth. But I assure you that they are already real.

Keep joy in your heart; it is not said that humanity will remain in darkness until the end of time. A big army is rising; it will move in a striking way in the decades to come.

You are all in the heart of the system, of this typhoon, which is to turn the world upside down in the right way.

As you often say, my daughter, "Lift up your hearts."

May you all never give in, keep the heart of a child in a powerful body, let your energies increase tenfold.

You are contributing to the development of a new world; help us in its fulfilment.

Have I motivated you all enough? It's up to you to see.

Be blessed for what you are doing already.

Babuji
