The Medium: Babuji, are you satisfied with my work?

Does this question really need to be answered? Do you believe that we don't see your efforts to please us, and the energy it requires of you?

There is nothing more to say, meditate and you will feel in your heart our true answer.

In future times, these messages will not be understood by all. Certain minds will always remain sceptical about this means of communication.

It is inevitable.

Those most open will benefit from another approach to our teaching and will be helped by it, which will be very positive for them. You can already see the reactions of those few who have access to it.

Here we are not in an academic style of writing, deliberately put aside.

We convey a few simple ideas, in a simple form, which does not mean simplistic.

Leave aside your literary background, what you all will gain from this is more important than syntax. We do not mean that it should be neglected, we are not read by ignorant beings.

We are only clarifying things.

Many will be able to read these writings, and may not read the books. By insisting on specific subjects in a concise fashion, we will touch the greatest number.

These writings are addressed most particularly to the heart, more than to the mind. See it that way for your own good.

Babuji
