Tuesday, October 3, 2000 - 10:00 a.m.

This boy is not a medium, but we can act on him in the sense that we can suggest information to him which you can confirm to him. We appreciate their way of doing this work with so much heart and an acute sense of analysis. They are perfect in their role and they will be able to speak about these messages with much conviction, having understood them in all their subtlety. We have explored a certain number of aspects of human behaviour and tried to draw your attention to the faults which you must correct to further your progress. We suggest to you a way of thinking and being, quite simply. It must put you more at ease with others and yourself.

"We don't impose anything and don't want to make you feel guilty on any account; that is not in our method. We only wish to help you to see yourself in your own reality and to make the decisions you deem useful for your inner transformation. You are the only judge of your behaviour; your fate lies in your hands. We only want to make you become aware of what these behaviours should be, so that you can go where you wish."
